Consulting Capability

Asparona

Asparona is a consulting company specialising in the implementation, support and continuous improvement of business applications.

Asparona's consultants have a diverse range of skills and practical experience gained from implementing, supporting and managing business applications in New Zealand, North America, Africa, Asia, Europe and Australia.

Our people can help you to extract the maximum benefit from your proposed or existing investment in business applications by applying our experience to assist with solving problems in today's challenging business environment.

We do not focus solely on the technology side of business. We can and do help you to transform and streamline your organisation or processes to implement solutions, whilst maintaining a pragmatic approach to ensure the change is made at an acceptable cost and in a sustainable manner.

Our expertise spans the full business lifecycle, from planning through to delivery, support and training, and continuous process improvement.

Business Consulting Services

Implementing a successful business application requires more than just bits and bytes. It requires synchronisation and alignment with the whole organisation to ensure the benefits are achieved and the application is accepted. Asparona can provide services to senior management and programme management office teams to facilitate this synchronisation and alignment.

Asparona's business consulting services include the following:

- Business process improvement
- Business process outsourcing
- Feasibility studies
- Solution selection and tender support
- Benefit realisation tracking
- Business case formulation
- Business re-engineering
- Organisational reviews
- Change or transformation management

- Infrastructure planning
- Facilities audit, review and quality assurance
- Security and disaster recovery planning
- Release & change management
- License audits

IT Consulting Services

Asparona's approach to information management and planning is to help you see past today's technical and operational requirements, and focus on the big picture – to gain and maintain a competitive advantage.

That ability to take a different pragmatic perspective, to look beyond your immediate requirements, combined with our global expertise, is what differentiates Asparona from other consulting firms.

Our IT Consulting Services include the following:

- Information systems strategic planning
- Portfolio management
- Development
- ITIL Compliance
- Testing
- Business and systems analysis
- Programme management
- Project management
- Training
- Infrastructure planning
- Facilities audit, review and quality assurance
- Security and disaster recovery planning
- Release & change management
- License audits
